

## **ENVIRONMENTAL POLICY – updated January 2020**

As a business, KDM uses no materials, substances or processes which are in themselves environmentally hazardous.

Protection of the environment impacts upon us in four areas as follows:

1. Office use of electricity & heating
2. Waste Disposal
3. Motor vehicles
4. Impact upon Activity Sites

### **OFFICE HEATING & ELECTRICITY**

We have a modern heating system that has been replaced within the past 2 years, and employ a strict policy that all computers, monitors, plugs & heating systems are turned off overnight via a master switch!

### **WASTE DISPOSAL**

All waste is correctly disposed, as we have both a general waste & a recycling collection from the local council – we have a strict internal policy to ensure that all recyclable waste goes into the correct bin!

The only additional items would (on occasion) be car batteries, old tyres, oil and white spirit which are taken to local authority depots.

### **MOTOR VEHICLES**

All vehicles are regularly checked and maintained within the manufacturers specifications to ensure that fuel economy is maximised, and pollution minimised.

Two thirds of our fleet of vans are no older than 18 months old, thus ensuring that the highest standards are met – we aim to replace the remainder of our fleet in 2020.

### **IMPACT UPON ACTIVITY SITES**

KDM's policy is at all times to cause no physical damage or harm done to outdoor activity sites. In addition it is our policy that all rubbish and debris is removed from the site at the end of an event, and correctly disposed of in accordance with the above.
